Town of Johnstown Flushing Water Lines

Johnstown, Colo., November 15, 2019 – This morning, Town Hall has received a few inquiries related to a possible yellowish tint to the water. The Town has tested the water and it is safe to continue drinking, meeting all state drinking water requirements. The cause was due to the change over from the raw water sources we use to treat and provide water. The Town has begun flushing hydrants which will expedite and accelerate resolution to the possible discoloration. We apologize for the inconvenience and concern this may have cause.
